Need to book in advance an excursion for groups more than 20 people. Please call to the Cold War Museum Visitor Center, mob. +370 677 86 574.

Cold War Museum is located in the former Soviet Union`s complex of ballistic missile silo launch. Since 1963 up to 1978, there had been deployed four medium- range ballistic missiles SS-4, armed with 2-megaton power thermonuclear warheads. These missiles, together with the nearby terrestrial platforms of analogue missile launching, had created a common Soviet nuclear armament group in Lithuania, which was able to destroy all the Europe.

Today, this secret object is open to the visitors. Former missile and the internal apparatus control facility are equipped with a historical exposition telling about the five decades of the Cold War- one of the most famous and most dangerous military conflicts in human history.
